Kiplant VS-04

**MORE RESISTANT PLANTS
WITHOUT RESIDUE**

Kiplant VS-04

Chitosan-based solution that favors the productivity of crops and stimulates the activity of beneficial soil microorganisms, increasing root development and giving rise to healthier and more vigorous roots.

How Kiplant VS-04 helps the growth of the crops?

- Direct action on pathogens.
- Enhances the root structure and rejuvenates the soil.
- Zero Residue product.

Why Kiplant VS-04 makes the difference?

Promoter and preventive effect

It's a physiological resistance inducer and growth promoter, it has preventive effect, reduces the negative impact on physiological stress situations.

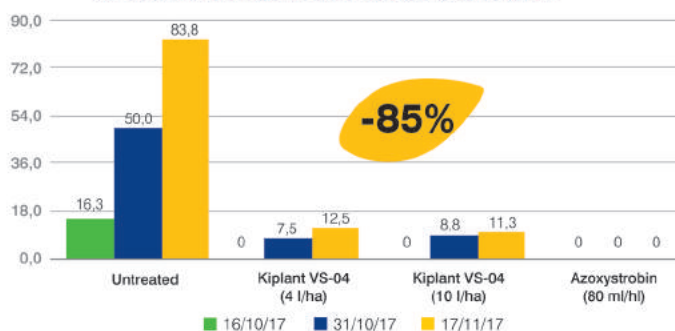

Repair Effect

Promotes the root lignification and allows roots that have suffered mechanical damage or pathogenic attacks to be reconstituted or replaced by new growth, maintaining the ability of the plants to be nurtured and exploring its production capacity.

APPLICATION PROCEDURE

Root application: 3-5 l/ha (radicular repair action);
5-10 l/ha (stress periods).
Foliar: 2.5 l/ha each 8-15 days.

% *Oidium* incidence in cucumber leaves
