

20 Piece Extruded rooftile machine

RSM-20

The Revaro RSM Range of Extrusion Cement Roof Tile Machines can produce different types of roof tiles, but double Roman style is the most popular. These machines come standard with a mixer and conveyor and produce tiles from river sand and cement. They are the most economical machines in our range and produces roof tiles on economical pallets. You can produce tiles starting from 500 per day; and by adding pallets and drying racks, production can be increased to up to 8000 tiles in 2 shifts. These machines also come with moulds to produce all the parts needed to install a roof.

Specs

Product	
Cycle Time	20Pcs / min
Anual Production	2,400,000Pcs
Product Dimensions	420 x 330mm
Machine Specs	
Method	Extrusion
Voltage	380V
Power	30kW
Materials	Rolled Steel
Production Team	10 Min Team Required
Surface Colour	Optional
Gross Weight	7400kg
